

Erasmus+ Project "BvB Migration+"
Strategic partnership project BvB Migration plus:
Vocational preparation and integration into the training market of refugee
youths and youths with a migration background

Project summary

Role R.U.S.Z: project partner; Project duration: September 1, 2018 to August 31, 2020.

Within the framework of the project "BvB Migration plus", under the leadership of the Diakonisches Werk des Kirchenkreises Rendsburg-Eckernförde (Germany) and together with six European project partners from Austria, the United Kingdom, Spain, Slovenia, Italy and Bulgaria, an EU-wide standardized concept of measures for vocational preparation is to be developed that is tailored to the needs of the target group. In addition, five occupational field-specific qualification modules for vocational preparation and two demand-oriented qualification modules for the acquisition of missing social competences are to be developed and tested selectively. The basis for the development of the measure concept as well as the qualification modules is a country-specific vocational analysis of existing measures and needs as well as case studies with the implementing personnel of the vocational preparation.

In order to ensure the sustainable use of the "target group-specific" concept of measures for vocational preparation, proposals for its implementation at the national level of the partner countries as well as at the EU level are to be developed in a guideline on how it can be implemented in the vocational training systems. Against the background of a future official recognition of the measure as a vocational preparation instrument on the one hand and implementing institutions on the other hand, possibilities for the sustainable implementation and also the financing of the measure concept are to be pointed out to political decision makers.
